Profile

Reliable and self-motivated entry level Full-Stack Developer. Experienced in quickly learning new technologies and skills without supervision.

Experience

STUDENT CODING DOJO– 2015- PRESENT

Completed training in building servers with Python using Django and Flask.

Passed final Python exam with a score of 9.9 out of 10. Exam required building and deploying a server to manage Login/Registration with custom validations and perform full-CRUD on an SQL database in under 4.5 hours.

Currently learning the MEAN stack building servers with Node.js, and Express and connecting to MongoDB with Mongoose.

400 + hours self-teaching front-end development. Leveraged tutorials, documentation and resources on the web to learn HTML, Css/Sass, Javascript/JQuery and Angular without guidance or supervision. Ranked 4th out of 300+ applicants to Apprenti Program at WTIA Workforce Institute.

INSTALL FOREMAN, IN HARMONY LANDSCAPES – 2006-2013

Started working with company as a landscape installer. Promoted to managing crews of 2-5 people based on excellent performance, and a consistently positive outlook.

FOUNDER, ONLINE FUNDRAISING, RUAHA CARNIVORE PROJECT – 2013-PRESENT

Designed and implemented a unique and successful online fundraising model. Partnered with a non-profit organization in Tanzania to set up motion-sensing cameras and used the photos of wildlife to raise money through Facebook.
